■ I have been enjoyed this course a lot, as i spend so much time for this course moer than 7.5 ETC required time to study. Participants are more than one nationality which bring more diversity. Course is quite well orgazized every week so that i know what i should have to do each week. For the course wish to imporve is to encourage group discussion despite of ditance learning, deveope group chatt-discussion at the same date and time. It will bring much more joy to study this course and connect all participants to make possible to give and take their thought and can help each other, be more activate on the course.

■ Add general exercises for students to do and submit.

- I think would be nice the interaction between the students trough different ways beside the course forums. I would be nice the correction of our mistakes trough the forums and by mail. I wish to be a little bit near to my teacher because I know he is a very trained man and I could learn a lot from him.
- I think that a greater presence of the teacher in the forum stimulates the share of the students.
- Maybe more control by the teacher ? I would have enjoy a correction of the exercises and report by the teacher in order to see my mistakes and improve... But anyway it was a really good course !!!! Tank you !!!!
